

LOG HANDLING

BYPRODUCTS HANDLING

LOG SORTING LINES

Of late years *lekartu rupnica* has developed a concept of log sorting lines that are suitable for different type of logs.

lekartu rupnica will take care of the project from planning and design to commissioning as well as operational staff training at customer's premises.

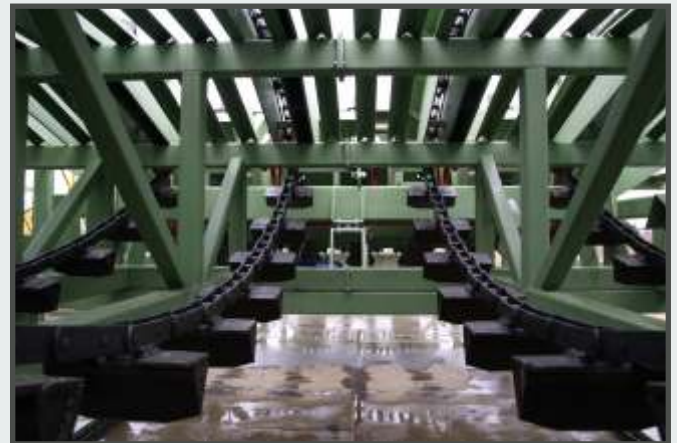

Available are sorting lines for logs with small, medium and big diameters.

Traditionally *lekartu rupnica* provides lines with **3D** log scanners (experience also with **X-ray scanning**) in cooperation with partners.

Company has developed automation and software solutions which will help to meet your specific needs in log sorting including numerous reports for printing or sending via network.

Performance:

- ⊕ Logs with a diameter from 140 to 700 mm; special solutions also for bigger diameters.
- ⊕ Log length from 2350 to 6200 mm; special solutions are also available.
- ⊕ Chain speed of sorting conveyor up to 100 m/min.
- ⊕ "Turn key" deliveries together with operator room, rooms for storage, container-type solutions for electric cabinets and hydraulic center, sorting boxes, service platforms.
- ⊕ Conveyors for waste and bark collecting and transporting.
- ⊕ Capacity up to 30 logs / min depends on length of logs (average more than 20 logs / min).
- ⊕ Number and design (one/two-sided) of sorting pockets according to customer's needs.

LOG HANDLING EQUIPMENT

Since the very beginning the factory focused on customized solutions for different types of handling equipment for woodworking industry. Significant knowledge has been mastered especially in log handling equipment.

Equipment can be designed and manufactured according to specific demands for log length, diameter and wood species.

Experienced personnel will help you to find the right solutions for specific requirements.

- ⊕ Log decks
- ⊕ Chain conveyors (longitudinal and cross conveyors)
- ⊕ Single log feeders
- ⊕ Step feeders
- ⊕ Log sorting conveyors
- ⊕ One side and two sides kickers
- ⊕ Metal detectors including belt conveyors
- ⊕ Log scanning solutions.

BYPRODUCTS HANDLING EQUIPMENT

Byproducts handling is essential part of every woodworking production. *Iekartu rupnica* designs and develops equipment according to the customer's special requirements. Equipment is reliable and of heavy duty construction. *Iekartu rupnica* has experience with different types of machinery manufacturing and installation, as:

- ⊕ Belt conveyors
- ⊕ Scraper conveyors
- ⊕ Chippers (in cooperation with partners)
- ⊕ Chip screens
- ⊕ Screw conveyors
- ⊕ Fans
- ⊕ Container loading systems
- ⊕ Containers
